metal delivers high quality materials and manufacturing work based learning.

Materials and Manufacturing Education Training and Learning (**metal**) is an industry demand led project aiming to up skill over 360 people in the field of Advanced Materials and Manufacturing through the provision of short, 10 credit courses at level 4 and above.

Based within the College of Engineering at Swansea University, a department that ranks in the top 10 for Engineering in the UK and has gained an international reputation of excellence, **metal** offers a series of Credit Qualifications that can be used towards professional development and also further education if desired.

What are the benefits?

- Personal development
- Enhanced performance
- Improve your promotion potential
- Apply knowledge to make process efficiencies
- Knowledge gained can yield improved productivity and adhere to quality standards
- Employees gain fundamental understanding of processes and gain confidence boosting morale
- Reduction in inefficient use of time and materials
- Positive experience gained via metal training can result in improved team cohesion

What can I do with my qualification?

Your Credit Qualification will be at a European recognised academic level. You can use it;

- As evidence of Continuous Professional Development and put towards professional qualifications such as Chartered Engineer (CEng) status
- To gain a Professional Learner Award by completing six courses
- Towards further learning and gain higher education qualifications.
- Progress onto part-time degrees and even up to a full doctorate
